

AIM for Windows  
1099-S Patch for 2006  
Release Notes

## Release Notes

---

### Purpose of This Document

To comply with the 2006 IRS changes, this patch includes the following modifications:

- A floppy disk drive can no longer be selected as a destination for a 1099-S file.
  - T (transmitter) record changes as follows:
    - ◆ Removed Replacement Alpha Character (positions 21-22) and Electronic File Name for a Replacement File (positions 396-410). A file that is an original, replacement, or correction is still indicated in the A record
    - ◆ Expanded Contact Email Address to 50 characters (positions 359-408)
    - ◆ Relocated Cartridge Tape File Indicator (positions 409-410)
  - Form 5064 Media Label Report is obsolete and has been removed.
- Note:** Refer to IRS Publication 1220 (for Tax Year 2006) for detailed information.

---

### Prerequisites

You must have one of these AIM for Windows versions installed:

- AFW 4.0.x
- AFW 4.1.x
- AFW 5.0.1

---

### Installing the Patch

The patch consists of two files – **S1099.mdb** and **1099S.exe**. Perform the following steps to install the patch:

Step	Action
1	Ensure all users are logged out of AIM.
2	Copy the updated <b>S1099.mdb</b> file over the existing file in each data folder on the AIM server directory. <b>Note:</b> If you have multiple databases, repeat this process for each data folder (e.g., \DATA, \DATA2, etc.).
3	Copy the updated <b>1099S.exe</b> file to the local AIM directory on each workstation.
